What to do when a fire breaks out

Escape to a safe place

Shout for help and call Fire Service

If trapped, find a safe passage to exit the building

Use the staircase if you are trapped in a high rise building

Grab a blanket (wet it if possible), wrap your body around it and crawl out

If doors are on fire, wet some clothes and place them under the door - it will stop smoke from entering the room

Do not run if your body catches on fire, Stop, drop and roll to put out the fire

Avoid using remedies such as toothpaste to treat burns on body

wash with tap water for 10 minutes

Seek medical help

LABORATORY SAFETY

Laboratory Dress

Housekeeping

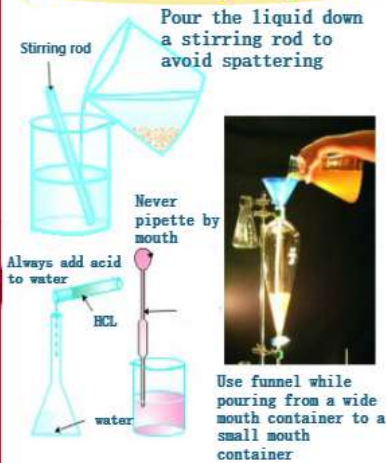

Keep the laboratory organized and uncluttered for fast evacuation

Chemical Spill

- Wear shoes covered from all sides while cleaning chemical spills
- Do not sweep spilled chemicals with a broom
- Spray agents that solidify chemical spills or neutralize them
- Do not dump cloth soaked in spilled chemicals in a water bin.
- Ventilate the room

Transferring Liquids

Labelling Chemicals

Always store chemicals in a rack and place a caution sign

Do not use the chemicals from unlabelled containers

Never store at locations where they can be knocked over

Harmful Vapours

Ventilate the room. Open all door and windows

Use Respirator

Mask

Use fume hood

Open all the windows to let the vapours out

Switch on the exhaust fans

Eye wash

Let water go directly into the eyes. Keep your hands free to hold your eyes open. Rinse eyeballs and interior of the eyes gently for about 15 minutes

Waste Containers

Segregate and dispose hazardous and non-hazardous waste in separate bins and bags

How To Use **FIRE EXTINGUISHER**

1

PULL THE PIN

2

AIM AT THE BASE

3

SQUEEZE THE LEVER

4

SWEEP SIDE TO SIDE
